

Technical Specification Sheet

Boogie

Characteristics

- Mid-season Maturity
- Afila Advantages
- Uniform Color Scores
- Excellent Early Vigor
- Medium Sieve Size – Approx 3.8
- High Yield Potential

Boogie is a 3.8 sieve, mid-season afila-type pea. **Boogie's** afila plant habit and it's determinant nature enhances the pod and berry color uniformity. A strong disease package and high yields make **Boogie** an excellent choice for a mid-season pea.

Days	Heat Unit	Node 1st Flower	Height in Inches	Vine Type	Pods per Node	Pod Shape	Seeds per Pound	Disease Resistance	Sieve Size	Color
68	1470	14-15	29	AF	M	B	2200	F ₁ , PM, DMT	3.8	Dark

Information in the chart is based on data collected in Moses Lake, WA. Any variety that is new to you should be tried in limited plantings under your conditions before you use it extensively.

Disease Abbreviations Key:

F₁, F₂ – Resistance to the respective races of Fusarium wilt

DMT – Downey Mildew Tolerant

Brotherton Seed Company – P. O. Box 1136 – Moses Lake, WA 98837 – 509-765-1816
