Sugar Bro

Characteristics

- Full Season Maturity
- Uniform Colour Scores
- Medium Dark Colour
- Approximately 10cm fleshy pods
- High Yield Potential

Sugar Bro is a medium diameter snap pea. A full season, normal vined snap, **Sugar Bro** handles cool soils very well and has shown strong plant vigour in all climates. Similar to Sugar Prince for size, maturity, and quality, **Sugar Bro** offers good yield potential in a snap pea and satisfies the market's demand for a high quality processed and fresh pack product.

Days	Heat Unit (Celcius to 100 tenderometre)	Node 1st Flower	Height in cm	Vine Type	Pods per Node	Pod Shape	Seeds per Kg	Disease Resistance	Sieve Size	Colour
68	815	14-15	66	N	D	Snap	4630	F ₁ , PM,	SP	Med Dark

Information in the chart is based on data collected in Moses Lake, WA. Any variety that is new to you should be tried in limited plantings under your conditions before you use it extensively.

Disease Abbreviations Key:

F1 – Resistance to the respective races of Fusarium wilt

PM – Powdery Mildew
